- +201011423350
- +201110260272

Technical Skills

- Next.js
- React
- JavaScript
- HTML
- CSS
- Java (android)

Soft Skills

- Problem-Solving
- Analytical Thinking
- Attention to Detail
- Project Management
- Communication
- Teamwork

COURSES

- HTML & CSS Full Course - SuperSimpleDev
- JavaScript Tutorial – SuperSimpleDev
- React 18 for Beginners – CodeWithMosh
- The Ultimate Next.js - CodeWithMosh

Education

- Bachelor of Architecture

Architect transitioning into software development with 6 months of experience as a Front-End Developer. Strong knowledge of JavaScript, TypeScript, React and NextJS, with hands-on experience in developing tech products and creating responsive, user-friendly web interfaces.

Experience

Frontend Developer at BasiscsEngage
Dec 2023 – Now

- designed and implemented functionalities such as: exporting analytics data as PDF and Excel files. This enhanced user experience by providing clients with convenient ways to share and analyze their marketing performance data.
- Utilizing [NextJs, Tailwind]
- Collaborated with other teams to deliver features that attracted over 5 new clients in six months.

Previous Projects

- [Game Hub](#) (React)
Built a single-page game hub application using React. Users can browse a curated list of online games, filter by genre, and access them directly within the application. This project helped me solidify my understanding of React component structure, state management, and user interface development.
- [Amazon Mockup](#) (JavaScript)
Developed an interactive product page mockup simulating the Amazon shopping experience using JavaScript. The project incorporated features like product selection, adding items to a shopping cart, and basic quantity adjustments. This project helped me grasp core JavaScript concepts like DOM manipulation, event handling, and user interaction.
- [YouTube Mockup](#) (HTML, CSS)
Built a responsive YouTube mockup website replicating core functionalities using HTML and CSS. The mockup included features like a search bar, video listings, and a navigation menu. This project helped me solidify my understanding of HTML structure, CSS styling, and responsive web design principles.
